

THE ELDORASIA CODEX · MOLEPIN · 2026

The Eldorasia Codex

Narrative-Based Whitepaper

This is more than a whitepaper.

It is the record of seventeen golden mole tribes,
and the birth of **The Unbreakable Chain**.

Understand through narrative. Verify through technology.

Born as a meme. Built to last. — MolePin

The **Fairy Clan** of the Divine Realm

Before Eldorasia existed, the most brilliant and beautiful beings in the divine realm lived and fell. Their transgression and choice created the Golden Mole.

***"The most brilliant fell the deepest.
Yet those who descended first — survived."***

ELDORASIA ORAL RECORD · BOOK ZERO

EPISODE 00-1 · THE GOLDEN AGE

The Most Brilliant Beings of the Divine Realm

In the primordial divine realm, there existed the **Fairy Clan**. Their eyes shone large and beautifully. Their bodies were long, lithe, and powerful. Their wisdom surpassed every other clan in the divine realm. Even the God Clan recognized and revered them.

The wisdom of the Fairy Clan was the light of the divine realm. But the brighter the light, the deeper the shadow it casts.

EPISODE 00-2 · THE AGE OF GREED

Wisdom Used as Bait

The Fairy Clan began weaponizing their wisdom. They planted falsehoods while knowing truth. They sold confusion while knowing prophecy. The balance of the divine realm began to crack.

Greed spread quietly. What began as small deceptions grew until the entire Fairy Clan had become a people that traded in wisdom — and the wrath of the God Clan crossed its threshold.

EPISODE 00-3 · THE PUNISHMENT

Beautiful Things Taken Away

Their brilliant shining eyes were blinded. The eyes that once pierced through the world with wisdom — gone.

Their sharp-hearing ears were made to atrophy. The ears that listened to others only to exploit them — closed.

Their long and powerful bodies were made short and small. The forms that once traversed the divine realm — rendered insignificant.

EPISODE 00-4 · THE VOLUNTARY DESCENT

The Choice of the Golden Mole

Yet not all of the Fairy Clan walked the same path. Just before the sentence was proclaimed, some made their own decision: **to descend underground.**

These were the ones who had stayed silent during the Age of Greed. They had not sold their wisdom — but lacked the power to stop the others. They carried guilt.

The form of punishment found those who descended too. Their eyes went blind, their bodies grew small. But within them, **the wisdom of the divine realm remained — sealed.** Their golden fur is the proof.

These beings, in the depths of the earth, founded seventeen tribes. This is the origin of **Eldorasia.**

The Eldorasia Chronicles

"The gods were arrogant, the humans were greedy, and nature was furious."

EPISODE 01 · THE OVERTURE OF EARTH

The Kingdom of the Golden Mole Tribes

In the beginning, seventeen golden mole tribes existed. Deep beneath the earth, they built a kingdom called **Eldorasia**.

Without eyes to see light, they sensed truth through the vibration of the earth, and carved gold with their claws to build their world.

EPISODE 02 · THE VANISHING GOLDEN MOLES

The Great Calamity and the Fall of Sixteen Tribes

A climate catastrophe born of human greed swept over the underground kingdom. Sixteen tribes vanished one by one. The last remaining was the final descendant of the seventeenth tribe — **MolePin**.

MolePin awakened alone. Only the memory of the lost remained. But MolePin did not give up. Digging — that was the only way a golden mole could exist.

EPISODE 03 · THE OATH OF SOIL

The Birth of The Unbreakable Chain

MolePin wove the heat of magma together with the souls of sixteen fallen kin into a single chain — **The Unbreakable Chain**. This is the blockchain.

No one can reverse it. No one can forge it. It cannot be severed in any land. Because the spirits of sixteen tribes are woven into it.

EPISODE 04 · THE ALLIANCE

The Fellowship of Those Who Dig

MolePin's story seeped up to the surface. Diggers began to gather. These are the **Allies**. Not investors. Those who dig alongside.

When an Ally pins a place, GPS verifies the visit, and community likes determine the mint. Action becomes MOL. This is **Proof of Dig**.

MolePin's 4 Fatal Flaws

The golden mole is weak. Blind, alone, powerless on the surface, and small. But these are the source of its narrative — and sealed within each flaw is a power from the divine realm.

FLAW 01

Blind

The mark of punishment — and the seal. The form of a choice: to no longer see the world through divine eyes. Even without sight, it knows truth. → **Instead of eyes, The Chain remembers.**

FLAW 02

Alone

After sixteen tribes were lost, MolePin is the sole survivor. Loneliness is a weakness — but being the last survivor is the very engine of the narrative. → **Allies restore the 17th tribe.**

FLAW 03

Powerless on the Surface

The surface is not a golden mole's world. But underground — none are stronger. Eldorasia is underground. → **MOL flows in the Underground (DEX).**

FLAW 04

Small and Slow

The golden mole is small. It doesn't explode like PEPE or DOGE. But it digs steadily, and ultimately builds the deepest tunnel. → **The tunnel keeps going deeper.**

FACT ANCHOR

The Golden Mole Actually Exists

Chrysochloridae (the golden mole family) are real, critically endangered mammals in Africa. Their eyes are vestigial and cannot detect light, but they have extraordinary seismic sensing ability. Listed on the IUCN Red List. The narrative of Eldorasia is fiction — but the weaknesses of the golden mole are fact.

The Five Golden Oaths

MolePin makes no promises. It declares what it renounces. This is the foundation of trust.

OATH I

We renounce team allocation.

Of the total 6.9 trillion MOL minted, not a single token belongs to the team. Developers are those who dig the first shovel — not those who claim the treasure. Zero team allocation is enforced by smart contract, not by declaration.

OATH II

We renounce additional issuance.

6.9 trillion MOL was dug exactly once. No inflation. No additional minting. Fixed supply is permanently sealed in the contract code.

OATH III

We renounce centralized control.

Fast to pause, slow to reverse — only through governance. The Asymmetric Guardian structure structurally limits any single administrator's unlimited authority. The Chain remembers; the community decides.

OATH IV

We renounce false utility.

MOL is issued through GPS action — not a single click. You must register a place, prove a visit, and pass community verification. This is Proof of Dig.

OATH V

We renounce silent promises.

We share the process at every step — not just results, but failures and corrections too. The Last Tribe digs alongside the community.

Proof of Dig — The Growth System

Only those who dig evolve. From Diggling to Elder of Eldorasia. The 17 Elder seats restore the sixteen extinct tribes.

LEVEL	TITLE	CONDITION
Lv.1	Diggling	First dig complete. MOL held, first place registered.
Lv.2	Scout	10+ places registered. Community verification pass rate 70%+
Lv.3	Tunneler	50+ places registered. The Mole Game 100+ participations.
Lv.4	Alliance Guard	Alliance Rite complete (.dex domain held). DEXignation linked.
Lv.5	Deep Digger	200+ places registered. Rare form unlocked 1+ times.
Lv.6 ★	Elder of Eldorasia	Community governance approval. 17 seats only. Responsibility to restore one extinct tribe.

ALLIANCE RITE

The Ritual of Alliance — DEXignation Integration

Acquiring a .dex domain is the Alliance Rite. It is not a discount — it is the ceremony of engraving your name on the chain across EVM and non-EVM chains. Allies who complete the Alliance Rite receive fee benefits and seasonal airdrop eligibility.

DXN INSCRIPTION

Evidence of Action Engraved in the Tunnel

A portion of the domain purchase action is inscribed as DXN. This is how The Chain remembers action — not as a reward, but as a record. DXN is the evidence of contribution to the ecosystem.

6.9 Trillion — Dug Once

Dug once. 99% opened to the community. Nothing left to hoard in the tunnel.

FIGURE	ITEM	DESCRIPTION
6.9T	Total Minted	Fixed supply. No additional issuance. Permanently sealed in contract.
99%	Community Distribution	Team allocation 0%. Undistributed supply flows to DeFi · DAO · Rewards pool.
0%	Team Allocation	Developers are those who dig the first shovel — not those who claim the treasure.
500K+	Seed Community	Initial community based on golf, MLM, and crypto networks.

SUPPLY COMPARISON

MolePin is the Most Scarce

MolePin 6.9T · PEPE 420T · SHIB 1,000T
MolePin's total supply is 1/61 of PEPE's and 1/145 of SHIB's — the most scarce structure among major meme coins today.

MOL TOKEN CONTRACT (BNB CHAIN)

0x694203c357E76F550fd009F8F2FEdC6d6E53C59E

The Chain That **Connects the Tribes**

Chainlink · Custom Bridge. Connecting multiple EVM and non-EVM chains — a MemeFi first. One route fails — the chain holds.

PRINCIPLE 01

Zero Leakage

No matter the route, balances are restored to the bit. Not 1 wei disappears.

PRINCIPLE 02

Same Name, Every Land

CREATE2 unifies contract addresses across EVM chains. A MemeFi first. The same address recognized on every chain.

PRINCIPLE 03

Asymmetric Guardian

Fast to pause, slow to reverse — only through governance. A single administrator's unlimited authority is structurally blocked.

PRINCIPLE 04

Sender-Only Defense

Minting on the receiving side is not blocked — cross-chain messages don't stall mid-route. The chain keeps flowing.

PRINCIPLE 05

The Sealed Contract

Solidity smart contract audit complete. BEOSIN Report No. 202607031722. Supporting chains continuously expanding.

DEXIGNATION CONTRACTS

CONTRACT	CHAIN	ADDRESS
DXRegistry	Polygon	0xdeed017611ff19209b8ffe0fcdb758069c24f14d
DXRegistrarController	Polygon	0xdeed0627aada737621c7bb735ba8223e7cfac8b7

CONTRACT	CHAIN	ADDRESS
DXReverseRegistrar	Polygon	0xdeed0574272138b31c3152626e7e28f4ea935360
MOL Token	BNB Chain	0x694203c357E76F550fd009F8F2FEdC6d6E53C59E

Supported chains: Ethereum · BNB Chain · Polygon · Base · Arbitrum · Optimism · Avalanche · zkSync · Tron + continuously expanding

The Official Eldorasia Lexicon

The official vocabulary bridging narrative language and technical language. This lexicon governs the world.

WORLD · PLACES

Eldorasia — The underground kingdom founded by seventeen golden mole tribes. The narrative name for the blockchain ecosystem.

The Burrow — The narrative name for KookminWallet. Your personal tunnel where all actions accumulate.

The Mole Square — The narrative name for MolePin Social Ecosystem. The underground plaza.

The Underground — DEX · decentralized · on-chain ecosystem in narrative form.

The Surface — CEX · traditional finance · centralized systems in narrative form.

CHARACTERS · GROUPS

MolePin — The last golden mole of the seventeenth tribe. Guardian of Eldorasia.

Ally — Community participant. Never use "Investor."

Elder — Top 17 ranked users. Each has resurrected one of the extinct tribes.

The Last Tribe — The team. Never use "Team" or "Developer" externally.

ACTIONS · MECHANISMS

Proof of Dig — MolePin's core reward principle. Fully replaces "P2E," "Earn," and "Stake."

Alliance Rite — The Ritual of Alliance. Narrative name for .dex domain acquisition. Replaces "discount."

DXN Inscription — Engraving. Narrative name for DXN token issuance. Replaces "reward/ airdrop."

Dig — All GPS activity actions. Replaces "Mine" and "Earn."

TECHNOLOGY · NARRATIVE MAPPING

The Chain — The blockchain. The Unbreakable Chain MolePin wove from magma and the souls of the fallen.

The Chain That Connects the Tribes — Narrative name for Chainlink · custom bridge.

The Sealed Contract — Narrative name for BEOSIN-audited smart contracts.

Same Name, Every Land — Narrative name for CREATE2 unified address structure.
